Product overview

No.	Description	Unit
1001-007-007	T01 Cross Chair Tube Black lacquer, Remix 123 sand grey	18 EA
1001-007	T01 Cross Chair Tube Black lacquer	2 EA

Carbon overview (kg CO2e)

Fully climate compensated: 0.0 kg CO2e

Methodology

Minimizing the direct carbon emissions is the first step, and then we offset the remaining through direct carbon removal activities. To make sure our offsetting is genuine, we follow the guidelines published by Oxford University. We invest in wood-based building materials that have a net-negative CO2e impact on the atmosphere, and we buy 20% more, just to be on the safe side. The Målbar tool calculates the total climate footprint relating from the product. This is calculated according to the new EU Product Environmental Footprint (EU PEF) rules and presented according to EN 14067 (Carbon footprints of products).

*The category 'Use phase' includes carbon emissions from recommended maintenance of the furniture (e.g., retreating with oil).

**The category 'Disposal' includes the carbon emissions during the final disposal of the products.

***The category 'Carbon storage' reflects the amount of carbon extracted from the atmosphere during the development of the materials (e.g., carbon stored in the wood during the growth of trees)*.
